Disadvantages:
 - Base Master is a 2-cylinder hydraulic piston pump with a lower output range for pumping concrete.
 - The machine can be used for transporting and setting concrete for slabs, bridges and other structures.

Applications:
 - Concrete, grout, structural mortar, refractory mortar.
 - For setting floor concrete.
 - For concrete placement in narrow and confined spaces.

Technical advantages:
 - Thanks to its unique mechanical engineering, it has a maximum output range of 2 to 15 m³/h.
 - The machine can be used for transporting and setting concrete for slabs, bridges and other structures.

Scope of delivery:
 - 1 x delivery unit
 - 3 x concrete pump cylinders
 - 3 x concrete pump hoses
 - 3 x concrete pump valves
 - 3 x concrete pump manifold
 - 3 x concrete pump hopper
 - 3 x concrete pump hopper lid
 - 3 x concrete pump hopper wheels
 - 3 x concrete pump hopper axle
 - 3 x concrete pump hopper nut
 - 3 x concrete pump hopper washer
 - 3 x concrete pump hopper spacer
 - 3 x concrete pump hopper lock
 - 3 x concrete pump hopper pin
